

Summer Holiday Challenges

This school holiday you can earn lots of stamps by completing our adventurous Summer challenges! You can do as many or as few as you like - just keep your evidence in a scrapbook or folder as a record of your learning.

Challenge 1 - Can you make an indoor or outdoor den? (1 credit)

Using old clothes, towels and bedding or even natural materials you can find outdoors, create your own den. Give your den a theme - will you create a castle, a house or even a laboratory?

Challenge 3 - Use recycled materials to make something new (up to 3 credits)

Glue together old plastic bottle caps to make a bag (glue gun recommended) or make an igloo using used milk bottles.

For this challenge, you can use any recycled materials to create something brand new - don't forget to send us your photos of your creations!

Challenge 2 - Sleep outside and make a diary entry (written or video) about your experience (1 credit)

Using your den, a tent or even just some blankets, create a space to sleep outside for the night. Make a video diary or written diary about your experience.

Extra Challenge (1 credit): **adult supervision only** - Plan a meal or snack to cook outside using a camping stove, BBQ or a safely made fire.

Challenge 4 - Plan to hold your own garage or car boot sale (up to 3 credits)

Create price labels (using mathematical symbols and decimal points for money correctly) and posters to advertise the items you have for sale. At the sale, use your biggest voice to encourage buyers to buy your goods - you might even create rhymes and songs to help you! At the end of your sale, count up the money you have earned and record the grand total somewhere special.

Challenge 5 - Complete Norfolk Library Service's Summer Reading Challenge 2016 (multiple credits available)

Visit <https://www.norfolk.gov.uk/libraries-local-history-and-archives/libraries/whats-on/summer-reading-challenge> or pop into any Norfolk Library for more information.

Challenge 6 - Make a nature themed cake (2 credits)

Draw a design for your cake and write out the recipe (with help from an adult if needed). Recipes should include a list of ingredients and numbered instructions about how to make the cake. You may want to use a cake recipe you can find and adapt it.

Make your cake and decorate it with a nature theme! Eat it up and enjoy!

Challenge 7 - Celebrate the Olympics this Summer and hold your own! (up to 2 credits)

Design your very own Olympics day/afternoon for family and friends!

Find out about which sports are included in the Olympics this year. Plan 4-8 separate events and use the park or your garden to set them up. Be creative about the props you use to create each mini competition.

Draw out a large score board - think about how you can use heats and finals to decide who the final winner for each event will be.

Extra challenge (2 credits) - Plan Brazilian themed food or entertainment for after the games!

To get your passport stamped, take evidence of all your hard work into school after the half term break. *If you joined the Children's University through the Library service, take your completed evidence form to your local library and they will issue you with stamps.*

Here at Norfolk Children's University, we love seeing what you have been learning so please share photos of your challenges via our Facebook and Twitter pages or email us at cs.norfolkchildrensuniversity@norfolk.gov.uk
